Education

- **Kent State University**, Kent, Ohio Fall 2017 - Spring 2020
Bachelor of Science in Computer Science [GPA: 3.541]
Minor in Applied Mathematics
President's list, Dean's list

Relevant Coursework/Skills: AP Statistics, AP Computer Science, AP Physics I, CSII Data Structures/Abstractions, CS III, Calculus I, Calculus II, Calculus III, Basic Probability & Statistics, Prob. Theory & App., Linear Algebra, Microeconomics, Structures of Programming Languages, Software Engineering, Computer Communication Networks, Big Data Analytics, & Database System Design. Python, R, SQL, Microsoft Office, HTML, JavaScript, CSS.

Employment/Research

- **Summer Research Assistant, Carnegie Mellon University**, Pittsburgh, Pennsylvania Spring 2019 - Present
Supervision under Dr. Christian Kästner and Dr. Bogdan Vasilescu. Project: "Sustainable Software Ecosystems", research will further explore sustainability challenges in open source with particular attention to the interaction between paid and volunteer contributors and stress and resulting turnover. Project Tasks: Students will empirical study sustainability problems and interventions, using interviews, surveys, and statistical analysis of archival data (e.g., regression modeling, time series analysis for causal inference).
- **Student Body President, Student Government** Spring 2019 - Present
Campaigned and elected to be president of the entire undergraduate student body. Will begin term starting April 17th, 2019.
- **Undergraduate Research Assistant- A 2-Approximation Algorithm for the Online Tethered Coverage Problem**
Assisted Gokarna Sharma, PhD at Kent State with artificial intelligence research. Created new algorithm to produce closer approximation in an online tethered robot to cover area in a planar environment with unknown obstacles. Published Paper.
- **Quantitative Researcher, AlgoTech Financial**, Zanesville, Ohio Fall 2018-Present
AlgoTech Financial is a startup company that specializes in algorithmic trading strategies that use machine learning in the cryptocurrency markets. I helped implement predictive mathematical models for different cryptocurrencies. In addition, I helped with the algorithmic development of the high frequency and machine learning strategies. Lastly, I built automated software to do descriptive and inferential statistical on PnL percentages.
- **Director of Business and Finance, Student Government** Spring 2018 - Present
*Campaigned and elected by the undergraduate student body. Handled a **7 figure budget** used for events for the student body, as well as, funding students to go to conferences. Created UI and database to store allocation applications digitally, opposed to previous paper method. Helped launch and fund free menstrual and birth control products for the student body in bathrooms.*
- **Undergraduate Teaching Assistant**, Kent, Ohio Fall 2018 - Present
Assisted statistics Professor Vezvaei and Pham with teaching three sections of MATH 10041 Introductory Statistics for the Fall 2018 semester. Teaching one section of Introductory Statistics and MATH 11012 Intuitive Calculus for Spring 2019.
- **Kent State Mathematics Tutor**, Kent, Ohio Spring 2018 - Present
Employed through the Academic Success Center. Help students by taking complicated topics and finding ways to break them down in a way that makes the most sense to the student. Our goal is to foster independent learning.
- **Presidential Search Committee Representative** Fall 2018 - Present
Selected by Kent State upper administration and Board of Trustees to represent the entire undergraduate student body to help elect the 13th university president. Responsible for gathering students concerns and communicating them with the committee.
- **COF Research- Maximizing Profit at the Local Greenhouse** Fall 2017 - Spring 2018
Created database for previous plant data, added new data to the database, modeled the data, and found the most profitable produce for the greenhouse to grow to maximize profits. Supply and demand, seed to table time, area optimization, germination success, and profit margin was taken into consideration to select the best produce to grow. Presented in Spring 2018 COF conference at Youngstown State University. My advisor for my research was Mikhail Nesterenko, PhD.
- **Kent State Plant Sale (Volunteer)** Fall 2017 - Present
10 hours a week at the Kent State greenhouse. Helped with planting, trimming, selling, watering, and creating database.
